

# The Tin Spin

## Fiberglass?—we ain't got no fiberglass

What if there were an insulation that had better acoustic absorption characteristics than fiberglass, equal thermal performance, was antimicrobial (resists microbial growth), was non-itch and contains no formaldehyde, was environmentally safe, **was cost competitive** and could even earn you LEED points by its use.

Not only an alternative to fiberglass but also to closed cell foam

It is here—It is available

## Another (yes another) GRIPPLE success story

### Quick Hits

- TITUS OMNI-NT Narrow T diffusers in stock
- Insulated Flex, Air Tites, Screws, Flex straps in stock
- Louvers, dampers, fire and smoke dampers ready to be quoted

A local contractor, who had not previously tried GRIPPLE, was convinced to try a test. He had two similar systems which he was hanging and was willing to try hanging one system his way (straps) and the other with GRIPPLEs. After hanging both systems the contractor has now ordered 850 GRIPPLEs to hang the remainder of the duct on the job.

**Utilizing GRIPPLEs will put money in your pocket.**

Call us to discuss how we can help you get started.

## Fan coil units with Paisley finish?

Maybe not paisley but TITUS can make special fan coil units. Tell us your requirements and let us show you how we can help. TITUS Fan coils—Vertical, Horizontal, Vertical stack

**CADVent** is here. Imagine getting a file from Lindab showing a scaled drawing for all the round/oval duct (maybe even rectangular) on a job. You make the corrections, for coordination, send it back to Lindab and we send you **every piece you need, tagged by piece number**. How much time and money could you save if you did not need to draw the job and could order directly from the file??
