FLAMEBAR

When installing FLAMEBAR, fire rated duct, please be sure to install it per the Firesparay standards. If you have any questions please contact us.

T₃SQs are coming into our warehouse. Make someone happy. Give them control.

The only thing better than a T₃SQ is a T₃SQ hung with GRIPPLE

Northeast Air Solutions is now selling/stocking Lindab Light. As you can see this includes snaplock, elbows, HETOs, reducers, "T"s and dampers

Northeast Air Solutions will be offering seminar/training sessions regarding many topics over the next few months. Our first session will deal with Air Distribution and be held March 16th in Braintree from 3 to 5 pm. We will discuss performance and application. We invite you, your colleagues, your employees or whomever you may feel may benefit from a little more knowledge about some of the things we deal with. The tentative agenda is shown to the right. Please contact us with the names of those you would like to attend. Soon after this session we will be scheduling another regarding fire dampers and smoke dampers. Later we will have Terminal Units, IAQ, Louvers, Filters, and other topics of interest (Hopefully to you).

If you sign up in the next 30 days we will waive the registration fee

Agenda
