ONE day ship

Over 200 Fan terminal boxes were supplied with angled hanger brackets, each bracket had a pre-punched hole. A GRIPPLE Hang Fast hanger with screw end (for mounting in shield, drilled into concrete deck) was supplied for each hanger bracket. The straight end was placed through the hole in the bracket. The GRIPPLE was adjusted and the box was hung. The contractor claimed he saved more than a week using the GRIPPLE hangers in lieu of threaded rod. 200 boxes were hung by a team of 4 men in **TWO DAYS**. He had estimated that this work was going to take two weeks. At \$50/hr this translates to a **SAVINGS** (in your pocket or his) of **\$13,000.00**

Lindab offers Anti-Microbial Ductwork

Lindab is now offering spiral duct and fittings with Agion anti-microbial coating. Agion has been proven, through exhaustive testing, to inhibit the growth of mold. Entire duct systems can now be fabricated to reduce the likelihood of mold growth. Schools, hospitals, labs, everyone will appreciate this added protection. Many studies have proven that cleaner air increases productivity. Lindab with Agion is one large step in helping to insure a clean air supply.
