No, not the sound of Santa's sleigh headed back to the North Pole. The sound of **money** in your pocket. We are talking Sacagaweas (I checked the spelling) none of this nickel and dime stuff. How? By offering FireSpray fire rated ductwork as an alternative to wrapping or enclosing to achieve fire ratings. This UL classified product is a less expensive alternative to either of the present methods used to achieve a fire rating. So, the Sheet Metal portion of the job gets increased, the insulation or sheet rock portions get decreased, the owner saves some money and you make some **\$money\$**. We would be happy to get you a quote for any job that you think you could use this product.

Yet another Gripple success story. 34" double wall duct is hung with 30 foot long Gripples. The contractor and owner say "Wow, it looks great".

Quick Ship

*TITUS now offers 10, 5,3 and 1 day ship on most RGDs
Yes that is correct!!! 10,5,3 and 1 day ship*

Lindab Double Wall

If you are using double wall spiral other than Lindab Self-sealing SpiroSafe you are costing yourself money. We offer double wall up to 58" inner diameter without flanges, or any other sealing method other than our gasket. Not only does it go together quickly but you then just screw it and walk away.

Insulated Flex in stock—Union Label

In our warehouse, in Braintree, we stock flex duct sizes 4 through 16. The product is UL listed and carries a union label.

NCA fire dampers are available preinstalled within sleeves. Dynamic and static type and many may be shipped the same day as ordered.

Louvers—all sizes shapes and colors are available. Louvers can ship in one day—Louvers with "Kynar like" finish can ship in 3 days.
