Breaking New: FLAMEBAR approved for Kitchen exhaust in Wisconsin

We are pleased to announce that we are now representing **KINETICS NOISE CONTROL**. **KINETICS** is a long established, full line manufacturer of sound attenuators and sound attenuating products. **KINETICS** manufactures all sizes, shapes, and types of sound attenuators. Square, rectangular, round, elbow, odd dimensioned, cross talk, stainless, packless, even louvers, as well as sound panels for built-up units. Kinetics has web based software to allow you to select and schedule your sound attenuating requirements from any computer and at any time. No disks to install, no networks involved. Contact us to get connected.

TITUS announces Enviro-Loc

TITUS showed their new lining in terminal units, fan coil units and plenum diffusers. This liner is made from re-cycled cotton. It has similar thermal and acoustic properties to fiberglass. Titus-hvac.com

TROX holds QLI seminar

Trox had 2 days of seminars regarding QLI induction/displacement units. The QLI is a perimeter unit that is displacement in the cooling mode and perimeter convection in the heating mode. These units have typical NC levels below 30 which allows them to meet the new classroom ANSI noise standards. Offices and patient rooms are other likely applications of this new technology. The unit can be two pipe or four pipe. Displacement systems have been shown to improve IAQ compared to overhead mixing systems. TROX also showed chilled beams, swirl diffusers, raised floor systems, displacement diffusers and nozzle diffusers. troxtechnik.com

Lindab receives award—shows Drum louvers.

Lindab received the AHR award for innovative technology for AgION coated anti-microbial SpiroSafe duct work. Schools, medical facilities, and houses are being built utilizing **Lindab** with AgION (23 jobs have recently been specified). Lindab also introduced their Drum Louver that mounts directly to the side of round duct. The latest version of Cadvent software was released allowing engineers to design with **Lindab** and get noise and pressure data at the touch of a button. Lindabusa.com
