FIRE Resistant Ductwork

Yes, UL classified duct systems that provide up to 4 hours of fire resistance. This system has been tested to both contain fire within the duct as well as prevent fire from penetrating the duct. This allows for duct to be supplied that does not need to be enclosed in soffits or shafts. Ducts can be rectangular, flat oval or round. No external wrapping is required. This product is suitable for inside or outside the building applications

Build Boston Dates
November 18th to
November 20th

Times
12 Noon to 7PM
Daily

We will have a sample of this product at the Build Boston Show as well as literature. After the show we would be happy to bring the sample and literature to your office so you can see the product and discuss possible applications. As always, if you have any questions please do not hesitate to call us.

Some possible applications: Smoke evacuation systems, Pressurization systems, Parking garage exhaust, Escape corridors, kitchen exhaust?, etc.
